**AMAIZEINGLY GREEN COMPLETES ABATEMENT PLAN MEASURES
*Plant to Resume Operations***

Collingwood, Ontario, July 17, 2009 – Amaizeingly Green Products, L.P. (AGP) (*formerly Collingwood Ethanol, L.P.*) today confirmed that the company has completed all projects initiated under its odour abatement plan. As a result, and in accordance with the Ministry of the Environment (MOE) Order, Amaizeingly Green intends to initiate its start-up protocol and resume operations on July 20, 2009

The company made significant progress towards the completion of the odour abatement plan in recent weeks due to the ready supply of local engineering and construction services, and the rapid delivery of all odour abatement and ancillary equipment. Through final discussions with the Ministry of the Environment over the past several days, the company was able to confirm its position that the facility is now ready to go back into production.

“We are proud of the diligent effort our operators, engineers and the contractors have put into the completion of the plan. ” said Martin Kazmir, General Manager, Amaizeingly Green L.P. “We are also happy to report that even in the face of a difficult manufacturing environment, no employees were laid off during this period of non-production and that the voluntary shutdown allowed our staff to perform extensive preventative maintenance on critical equipment and to clean our plant to a pristine condition.”

As with the completion of the odour abatement projects, the plant start-up process will keep environmental protection and safety at the forefront.

“We are excited and confident that recently-installed odour abatement equipment, when fine-tuned and fully commissioned, will be the platform for a fresh new start for our relationships with the local community. I am absolutely committed to getting it right,” said Kazmir.

With regard to noise abatement measures, a silencer has been installed on a piece of equipment that emits a gasping, rush-like noise (referred to technically as an “impulse” noise) on top of one of our silos. It is projected that the silencer, installed on a voluntary basis, will decrease the noise emitted from this source by more than half.

About Amaizeingly Green Products, L.P.

Amaizeingly Green Products, L.P. is a producer and supplier of agriculture and industrial products, pet food ingredients and aquaculture food ingredients for domestic and international markets. In addition, the company produces and distributes a natural, ecologically-friendly fertilizer and is one of the largest natural fertilizer suppliers in Canada. Amaizeingly Green’s corn wet milling facility is unique to Canada due to its wide variety of value-added products.
