

COMMUNITY UPDATE: September 1, 2011

EMPLOYEE RECALL AND START UP NOTIFICATION

After the mid-summer shutdown, Amaizeingly Green Products (AGP) is pleased to announce that employees have been recalled and the facility will begin start up procedures today, September 1, 2011. The plant will be brought online in a very controlled, systematic fashion over the next week. We anticipate that we will begin grinding corn on Monday or Tuesday. Ethanol and co-product production will resume late next week.

Throughout the shutdown, many projects have been completed to increase efficiency in many facets of the process.

Status reports are posted on our website: www.amaizeinglygreen.com/community.
