Amaizeingly Green Submits Odour Abatement Plan Report

Collingwood, Ontario, September 8, 2009 – Amaizeingly Green Products, L.P. (AGP) submitted an assessment report to the Ontario Ministry of the Environment (MOE) today on the effectiveness of its recently-implemented odour abatement plan. The assessment, conducted by a third party engineer and yet to be reviewed by the MOE, concluded that AGP met the objectives it had set out to achieve in the plan.

"While we are pleased that the report confirms achievement of the objectives set out in the odour abatement plan, we are committed to continuous improvement" said Martin Kazmir, general manager at AGP. "In this regard, we have applied for and received ministry approval to carry out trials of some odour control techniques that we are confident will further reduce and stabilize our emissions. None of these techniques were being used during the testing period."

AGP will be releasing further information regarding this report upon the MOE's review.

About Amaizeingly Green Products, L.P.

Amaizeingly Green Products, L.P. is a producer and supplier of agriculture and industrial products, pet food ingredients and aquaculture food ingredients for domestic and international markets. In addition, the company produces and distributes a natural, ecologically-friendly fertilizer and is one of the largest natural fertilizer suppliers in Canada. Amaizeingly Green's corn wet milling facility is unique to Canada due to its wide variety of value-added products.
